## Career Objective

---

I would like to contribute to your organization as a web developer, leveraging my ability to develop static, dynamic and E-commerce web applications using readily available web frameworks. With my passion for learning, I will be able to take part in empowering your team with my newly found coding skills. As a process driven person, I believe I'll be able to come up with results needed to carry out a given task or project. My dedication, focus and self-sufficiency will allow me to grow and impart significant success for the benefit of myself, the company and its people.

## Technical Skills

---

### Technologies:

- HTML/HTML 5
- CSS/CSS 3
- Javascript
- JQuery
- AJAX - JSON
- Bootstrap 4
- Materialize
- Angular JS
- Node JS
- Ant JS
- React JS
- PHP
- Quasar
- Wordpress
- AWS Cognito
- Jest
- Reat Native
- React Redux Toolkit
- Expo
- Figma
- Xcode
- Simulator & Emulator
- MongoDB
- VSCode
- Git CLI & Sublime Text
- Postman
- Linux OS
- macOS
- Android Studio

### Development Tools:

- Apache
- MySQL
- Laravel

### Repository Tools:

- Github
- Gitlab
- Heroku

### Project Management Tools:

- JIRA
- Trello
- Slack
- Backlog

---

## Professional Experience

---

### **Software Engineer (SE3) (July 2021 – February 2024), Pointwest Innovations Corporation**

Provide development for a web and iOS application system of a known Motor Vehicle Manufacturing USA based which provides diagnostics software and hardware for commercial truck, automobile, and off-road industries. And develop a web, and mobile applications for Customer and System Administration of AP Cargo. The leading domestic shipping and logistics provider in the Philippines. Involved in sprint planning, daily stand ups and retrospect to ensure that all user stories defined by the team are met and delivered on time as scheduled.

Provide development and maintenance this includes complete back-end to front-end development for a web application system of a known farm international corporation. Involved in sprint planning, daily stand ups and retrospect to ensure that all user stories defined by the team are met and delivered on time as scheduled.

---

## Project Experience

---

### **AP Cargo (May 2023 to February 2024) – Web and Mobile Developer (Frontend)**

Tasked to develop AP Cargo's web and mobile applications for Customer and System Administration using monorepo architecture, React Native and React Redux Toolkit for frontend, and NodeJS, AWS and MySQL for backend infrastructure. Translated Figma designs into user-friendly frontend features using React Native and React-Redux. Created unit tests for each feature using Jest to ensure code quality and reliability using Jest. Developed modular applications for efficient reuse. And involved daily stand ups together with the whole team of the project.

### **Diesel Repair App iOS (November 2021 to May 2023) - Mobile Developer (Frontend)**

Develop for frontend of the Diesel Repair App iOS using AWS Cognito, Quasar, Javascript, and Swift. Involved daily stand ups together with the team and a twice a week meeting with the client.

### **Pointwest Technologies Corporation Website (July 2021 to October 2021) - Wordpress Developer**

Develop for improvement of the Pointwest Technologies Corporation Website using Wordpress, Php and CSS. Involved daily stand ups together with the team.

### **G-Force Kiosk (March 2020 to April 2020) - Software Developer (Frontend)**

Develop for frontend of the G-Force Kiosk using AntJS, ReactJS, NodeJS, CSS, HTML, and MongoDB. Involved daily stand ups together with our own app developer.

### **SMS Blaster (January 2020 to February 2020) - Software Developer (Frontend)**

Develop for frontend of the SMS Blaster an application system that can send up to date messages to its client using AntJS, ReactJS, NodeJS, CSS, HTML, and MongoDB. Involved in sprint planning and daily stand ups.

### **Paiwi Online (June 2019 to December 2019) – Junior Software Developer**

Develop for improvement of a published web application system using MongoDB, NodeJS, Javascript, HTML, CSS, Materialize, and AngularJS. Involved in sprint planning, daily stand ups and retrospect. Completed 5 – 10 stories, suggestion, and bugs per sprint (on average).

### **Fret Cleaners (February 2019) – Full Stack Web Developer**

Develop a booking system for a capstone 3 project only. It's a booking website services using MongoDB, ExpressJS, NodeJS, HTML, CSS, Javascript, Bootstrap, JQuery, Laravel, REST API, Fetch API, Passport, JWT, Mongoose, Body-parser, and Bcrypt-nodejs.

### **Book2GO (January 2019) – Full Stack Web Developer**

Develop an e-commerce website for a capstone 2 project only an asset management system using Apache, MySQL, PHP, HTML, CSS, Javascript, Bootstrap, JQuery, and Laravel as the main framework for the project.

### **Madelicious (November – December 2018) – Developer**

Develop a static website for a capstone 1 project only with Home, About, Contact, and Gallery pages only. Mobile Responsive Design is applied using HTML, CSS, and Bootstrap languages.

---

## **Education**

---

### **Southern Mindanao Colleges, Jamisola St. Pagadian City**

BS Computer Engineering, (June 2013 - March 2018) | Southern Mindanao Colleges, Z.D.S

### **Zuitt Coding Bootcamp, Makati City, Philippines**

Full-Stack Web Developer, (November 2018 – February 2019) | Tuitt Coding Bootcamp, Metro Manila, PH

### **VARIA Cyber Security, Quezon City, Philippines**

Vulnerability Assessment & Penetration Testing, (June 2019 – July 2019) | VARIA Cyber Security, Metro Manila, PH
